

Services

❖ **Integrated evaluation of polymeric materials**

We carry out a thorough professional evaluation of the corresponding materials, distributors and manufacturers based on your technical, regulatory and commercial requirements. In particular for pharmaceutical primary and secondary packaging materials, up to high performance polymers for technically demanding applications.

- Developing a long-term global supply strategy
- Information about the newest materials and trends
- Continual comparison of market prices and services
- Creation of expert reports

❖ **Product development for primary packaging materials, mixing, dosing and application systems**

From the idea to series production. Independently or as a partner, we apply our knowledge, creativity and vast passion to the implementation or development of your ideas.

- Development of technical solutions based on systematic and methodical approaches.
- Independently or in cooperation we create tender specifications from which we then develop the technical specifications
- Creating prototypes and pilot series
- Manufacturing possibilities and costs are already outlined at the product development stage.
- Developing production and tooling concepts
- Patent research

❖ **Project management**

We assist you in realising your projects or we take on sole responsibility for the complete planned projects or part projects, from initialisations to the successful conclusion.

- Coordination of all project activities
- Project controlling
- Project documentation and presentation
- Moderation and conflict management

❖ **Provision of materials, equipment and tools, as well as services**

Our global network of material manufacturers, equipment manufacturers, plant engineers and service providers enables us to offer a cost-optimised security of supply to meet your individual requirements.

- Procurement market research
- Supplier analysis, evaluation and selection
- Relationship management

❖ **Marketing and sales**

We have participated extensively both as a visitor and an exhibitor in sector specific trade and supplier fairs in Europe, America and Asia. We are glad to share this wealth of experience with you.

- Analysis of the international trade fair landscape
- Organisation and participation in international trade fairs
- Trade fair training, presentations and appearances
- Trade fair scouting, targeted search for products and services
- Identifying and opening up new markets
- Presentation of product and concept studies to select clients/partners

❖ **Process optimisation and production transfer**

Our services are based on many years of experience in order processing, production planning, sampling and coordination of tool maintenance, injection moulding production, combined with intercultural skills and current LEAN principles.

- Transfer of injection moulding production and automation in Germany and abroad
- Analysis of your manufacturing processes with suggestions for technical and organisational improvements in Europe, Asia and America
- Coaching and training in various manufacturing sectors
- Establishing qualification and validation status

❖ **Interim management**

Our work is supported by excellent social skills, broad intercultural understanding, experience in diverse technical disciplines, as well as 25 years management experience with profit responsibility.

- Bridging management bottlenecks in cases of unplanned departures, sabbaticals, sickness, etc.
- Assistance and support with reorganisation
- Support or release of management
- Troubleshooting in conflict situations
- Increasing efficiency through team-building measures
